About This Portfolio

This portfolio presents four live SEO projects I manage or have managed, across Shopify e-commerce, WooCommerce retail, geospatial and climate tech, and industrial services in Saudi Arabia.

Every project is backed by a screenshot taken directly from Google Search Console for the live property. Date ranges, clicks, impressions, CTR and average position are real, unedited figures. For each project I list my role, the strategy applied and the outcome.

I am happy to walk through any project on a call, including the tactics used, content samples and the ongoing plan.

Results at a Glance

Project	Niche	Clicks	Impressions	CTR	Avg. pos.	Period
Equine Care	Shopify e-commerce	6.4K	634K	1.0%	8.6	Jul–Oct 2026
AI Geo Navigators	GIS & climate tech	4.65K	491K	0.9%	10.1	Jul–Oct 2026
STS GCC	Industrial services, KSA	1.12K	75.7K	1.5%	15.6	Jul–Oct 2026
Games Gravity	WooCommerce retail	1.47K	135K	1.1%	12	Mar–May 2026
Total (4 projects)		**13.6K**	**1.34M**			

Search Console default view: 3 months, web search. Totals cover all four projects.

My SEO Approach

- **Audit first.** Every engagement starts with a full technical, on-page and content audit before any execution.
- **Keywords tied to commercial intent.** Content is built around what searchers want to do, not only what they want to know.
- **On-page foundations done right.** Titles, meta descriptions, headings, schema and internal links come before chasing backlinks.
- **Built for classic search and AI visibility.** Content is structured for Google AI Overviews, ChatGPT and Perplexity citations.
- **Relevant backlinks.** Earned through outreach, guest posting and digital PR, with relevance ahead of volume.
- **Reporting tied to business outcomes.** Monthly reports track clicks, conversions and leads, not rankings alone.

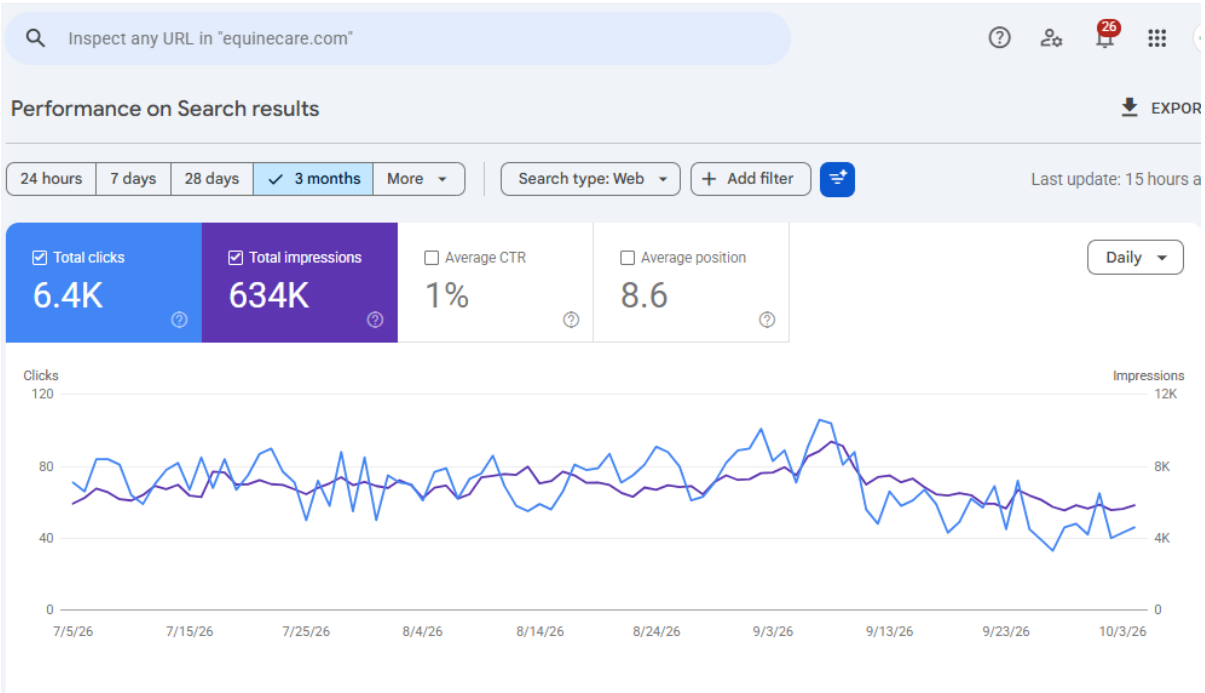

CASE STUDY 1

Equine Care | Shopify E-commerce

Website	equinecare.com
Platform	Shopify
Niche	Equestrian care, farrier tools, leather goods and hoof care products (US market)
Period	July – October 2026 (latest 3 months shown)
Role	SEO Lead, responsible for strategy and execution

Key Metrics: Latest 3 Months (July – October 2026)

Total clicks	Total impressions	Average CTR	Average position
6.4K	634K	1.0%	8.6

Google Search Console, equinecare.com, last 3 months

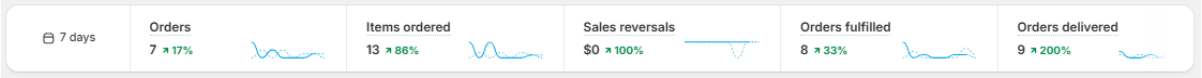

Strategy Applied

- Structured the collection page architecture and product page hierarchy aligned to commercial keyword intent in the farrier and hoof care niche
- Created a keyword map across 13 hoof knife product variants, with a dedicated target keyword for each (hoof knife, farrier hoof knife, double edged hoof knife, loop hoof knife and more)
- Applied a power word + target keyword + differentiator formula to product titles, for example "Ultimate Double-Edge Hoof Knife with Premium Wooden Handle"
- Supported the store with a separate blog property (equinecareblogs.com) targeting informational long-tail queries, building topical authority without cannibalising product pages

- Fixed heading hierarchy issues across product pages, collection pages and the footer after a technical SEO audit
- Structured content, schema markup and clear question-and-answer formatting for Google AI Overviews

Outcome

In the latest three months the store earned 6.4K clicks and 634K impressions from Google search. An average position of 8.6 puts the average query on page one, across a wide range of product, collection and informational searches. The live store keeps processing regular orders:

Shopify orders panel, equinecare.com, last 7 days (orders come from all channels)

Next phase: lift CTR on high-impression product and collection queries, and steady traffic after the seasonal softening visible in late September.

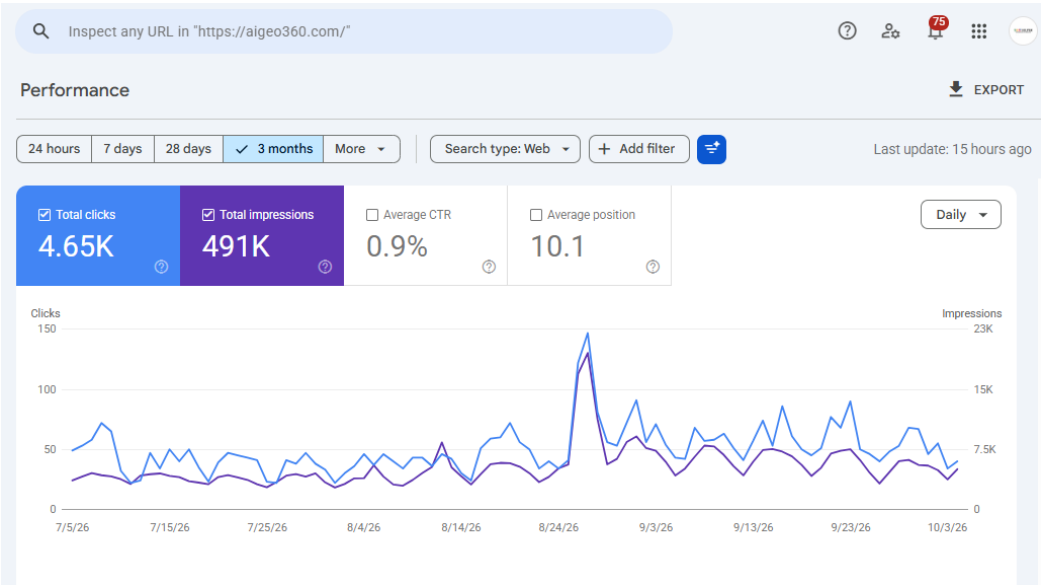

CASE STUDY 2

AI Geo Navigators | GIS & Climate Tech

Website	aigeo360.com
Company	AI Geo Navigators
Niche	GIS, remote sensing, geospatial AI and climate intelligence (Pakistan and international)
Period	November 2025 to present
Role	SEO Lead, ongoing optimisation and visibility management

Key Metrics: Latest 3 Months (July – October 2026)

Total clicks	Total impressions	Average CTR	Average position
4.65K	**491K**	**0.9%**	**10.1**

Google Search Console, aigeo360.com, last 3 months

Growth in Monthly Averages

Metric	Nov 2025 – May 2026 (6 months)	Jul – Oct 2026 (3 months)	Change
Clicks per month	~975	~1,550	**+59%**
Impressions per month	~132.5K	~163.7K	**+24%**
Average CTR	0.7%	0.9%	**+0.2 pts**

Monthly averages calculated from Search Console totals: 5.85K clicks and 795K impressions over 6 months, and 4.65K clicks and 491K impressions over 3 months.

Strategy Applied

- Built topical authority around GIS mapping, remote sensing, climate risk, ESG and geospatial AI, positioning the site as a reference source for these searches
- Pillar-and-cluster content architecture: core service pages (GIS solutions, predictive modelling, climate risk adaptation, decision support and digital twins) supported by case studies, blog, news and podcast content
- FAQ and HowTo schema markup to support rich results and Google AI Overview eligibility
- Ongoing competitor gap analysis against geospatial and climate-tech firms
- Technical health: Core Web Vitals, crawl optimisation, indexation monitoring and schema validation
- Internal linking to consolidate authority across topic clusters and support priority service pages

Outcome

Monthly clicks rose by about 59% compared with the earlier six-month window, and CTR improved from 0.7% to 0.9%. Daily clicks peaked at almost 150 in late August. An average position of 10.1 keeps a wide keyword footprint at the edge of page one, which is the base for the next phase: CTR optimisation and featured snippet targeting.

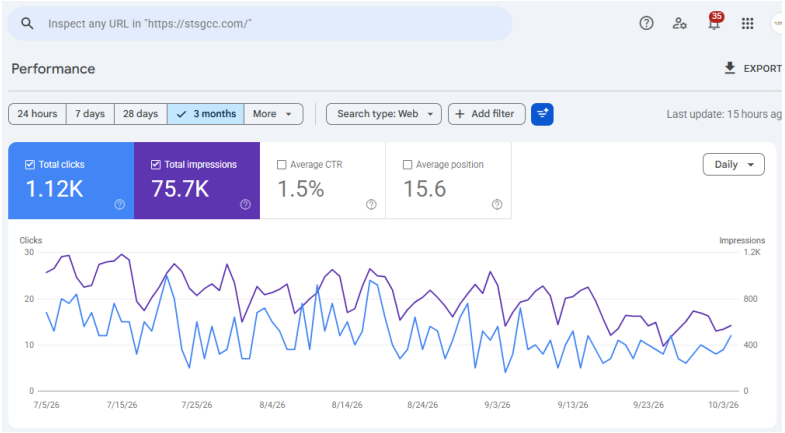

CASE STUDY 3

STS GCC | Industrial Services, Saudi Arabia

Website	stsgcc.com
Company	STS GCC (Shine Technical Support)
Niche	Manpower supply, industrial materials trading, HSE solutions and general contracting in Al Jubail, Saudi Arabia
Period	February 2026 to present
Role	SEO Lead, ongoing optimisation and visibility management

Key Metrics: Latest 3 Months (July – October 2026)

Total clicks	Total impressions	Average CTR	Average position
1.12K	**75.7K**	**1.5%**	**15.6**

Google Search Console, stsgcc.com, last 3 months

Strategy Applied

- Rewrote and restructured core service pages around commercial keywords for buyers of manpower supply, industrial trading, HSE and contracting services
- Location-focused targeting for Al Jubail and the Eastern Province to match how local B2B buyers search
- Content on common manpower and HSE questions, routing informational visitors toward service pages
- Organization, Service and FAQ schema markup to strengthen entity recognition and featured snippet eligibility
- Technical health monitoring: Core Web Vitals, indexation and crawl efficiency
- Internal linking and monthly tracking focused on conversion-relevant queries

Outcome

A 1.5% CTR at an average position of 15.6 shows that the site earns clicks even from page two, which reflects strong titles and descriptions for a specialised B2B audience. The next phase focuses on moving priority service queries from page two onto page one, where click-through rates are typically several times higher.

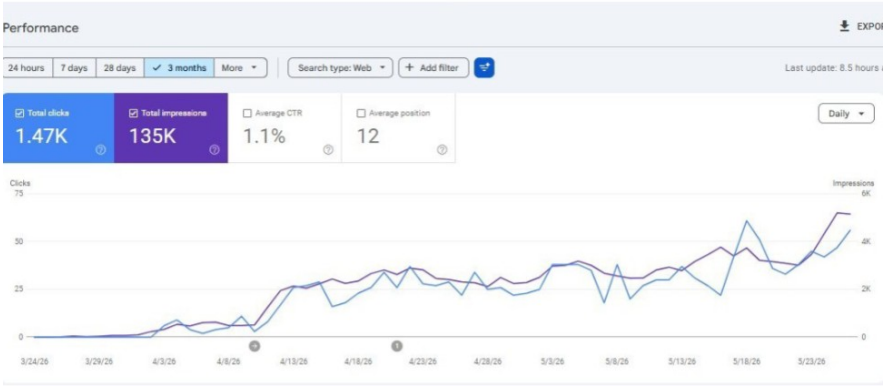

CASE STUDY 4

Games Gravity | WooCommerce Gaming Store

Website	gamesgravity.net
Platform	WordPress + WooCommerce
Niche	Gaming PCs, PC components, consoles, accessories, gift cards and repair services (Bahrain and GCC)
Period	March – May 2026 (3 months shown)
Role	SEO, e-commerce and on-page optimisation

Key Metrics: 3 Months (March – May 2026)

Total clicks	Total impressions	Average CTR	Average position
1.47K	135K	1.1%	12

Google Search Console, gamesgravity.net, 3 months (March – May 2026)

Strategy Applied

- Category architecture for high-intent product searches: custom PC builds, graphics cards, processors, monitors, consoles and accessories
- Brand and product-line targeting for the brands buyers search by name, such as NVIDIA, AMD, MSI, Corsair, Logitech and HyperX
- Product and category page optimisation: titles, meta descriptions, headings and descriptive copy built around product specs and buyer intent
- Local SEO for Bahrain and GCC shoppers, supported by multi-currency pricing (BHD, SAR and USD)
- Product schema markup (price, availability and brand) for rich results in Google Shopping and search
- Service pages for PC, laptop and console repairs to capture local service searches alongside product traffic

Outcome

Across the three months shown (late March to late May 2026), the store earned 1.47K clicks from 135K impressions, with a 1.1% CTR and an average position of 12. Daily clicks grew from single digits in early April to a peak of about 60 in mid-May, and daily impressions rose to around 5K by late May. Next phase: move priority category and product queries from an average position of 12 into the top half of page one.

Across All Projects

Organic clicks	Impressions	Best CTR	Best avg. position
13.6K	1.34M	1.5%	8.6

Combined across all four projects, in the periods shown.

What This Demonstrates

- **Steady growth on WooCommerce:** gamesgravity.net earned 1.47K clicks and 135K impressions in three months, with daily clicks rising from single digits to about 60.
- **Strong page-one visibility for e-commerce:** equinecare.com earned 6.4K clicks and 634K impressions in three months at an average position of 8.6.
- **Scaling an established site:** aigeo360.com increased monthly clicks by about 59% and lifted CTR from 0.7% to 0.9%.
- **Titles and meta descriptions that earn clicks:** STS GCC earns a 1.5% CTR from an average position of 15.6, which is strong for page-two rankings.
- **E-commerce on both major platforms:** Shopify (Equine Care) and WooCommerce (Games Gravity).
- **Range across niches and markets:** US e-commerce, GCC retail, Saudi industrial services and climate tech.

Next Step

I am happy to walk through any of these projects on a call, share live access where appropriate, or run a free initial audit on a site you are considering bringing me in to support.

Thank you for reviewing.
